Claims 15-24, pending in this application, are subject to the following restriction requirement.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 15-18, drawn to a method of visualizing the endoplasmic reticulum of at least one least cell.

Group II, claim(s) 19, 21-22, drawn to a composition comprising an isolated polypeptide.

Group III, claim(s) 19-20 and 23-29, drawn to a composition comprising an isolated polynucleotide, a transformed plant/cell comprising said polynucleotide.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical features of Group I that are not recited in any of the other groups are considered to be visualizing endoplasmic reticulum of a cell using antibodies and electronic microscope. The step of fixing and contacting at least one cell with a composition comprising an isolated polypeptide with a carrier are not required by any of the other groups.

The special technical feature of Group II that is not recited in any of the other groups is considered to be a composition comprising an isolated polypeptide.

The special technical features of Group III that are not recited in any of the other groups are considered to be a composition comprising an isolated polynucleotide
